

Announcing a Special Speaker Meeting of the Fibromyalgia Fight Club & CFS Nova Support Groups:

CFS/ME Research Study

Dr. James Baraniuk, Georgetown University, will speak at our next meeting at Arlington Central Library regarding recruiting patients and healthy controls for his current research study: ***Exertional Exhaustion in Chronic Fatigue Syndrome (CFS)***. This research is being done because Dr. Baraniuk has found changes in the brains of people with Gulf War Illness in a previous study.* It is possible that there are similarities between GWI and CFS that are related to problems in the brain.

Saturday, August 16 at 2 PM

Arlington Central Library
2nd Floor Meeting Room
1015 N. Quincy St.
Arlington, VA 22201

.3 mile from VA Square Metro — parking in outdoor lot and indoor garage
