No VA CFS / FMS Support Group with CFSupport
Summer 2006 Print Newsletter

Meetings: - 3rd Saturdays -  2-4 PM - Mason Governmental Center-Large Conference Rm-6507 Columbia Pike Annandale VA 22003. Free, close parking. No stairs. Same building as the Mason District Police Station, inside beltway, between Sleepy Hollow & Lincolnia Rds. Meetings facilitated by Elly Brosius. Please refrain from wearing scented products.

The NoVA CFS/FMS Support Group with CFSupport is an informal educational discussion group with meetings , a Yahoo group for email outreach and a website with many resources. We welcome people with Chronic Fatigue Syndrome, Fibromyalgia and related disorders such as IBS, MCS, & the Orthostatic Intolerances: NMH, POTS and MVPS / dysautonomia. We are volunteer and peer lead by volunteers who respect and talk fluently about the symptoms and issues surrounding conditions in depth. Please join us and share in our discussions, speaker events, and low volume e-mail list.
See our website for:
- lists of practitioners, health care & legal
- books, videos, articles, links
- more organizations for CFS/FM and other
- clinical trial info, research information
- coping tips, treatment articles
- media coverage, conference information
- detailed newsletters, and more.

Dysautonomia means dysfunction of the ANS (autonomic nervous system) and involuntary functions such as respiration, blood pressure, heart rate, and digestion. Symptoms include neck, back, and other muscular aches, tension or twitching; lightheadedness; irritable bowel; chest pain; panic; anxiety; fatigue; migraines; weakness; alcohol and heat intolerances; pallor or redness of extremities; numbness/tingling; depression/mood swings; loss of concentration; hypersensitive startle reflex; memory problems or foggy thinking; swelling of extremities, feelings of electrical current; skin problems; sleep difficulties; allergies; feeling hot or cold-unrelated to external temperature; visual disturbances and more.

Chronic fatigue syndrome (CFS/CFIDS) has long-lasting, multiple effects including severe exhaustion, widespread muscle weakness and pain, disabling problems with memory and concentration, and persistent flu-like symptoms.

Fibromyalgia Syndrome (FMS/ FM) is a complex, chronic state known for its widespread pain and fatigue, with a variety of other symptoms. The name derives from "fibro" meaning fibrous tissues (such as tendons and ligaments), "my" meaning muscles, and "algia" meaning pain. FM is pain in the soft tissues around joints, skin, and organs throughout the body.
